Garage	**Yes**
Solar panel	**Yes**
Bike rack	**Yes**

Description

Hymer B 504 DL – Comfort, Safety and Premium Touring Capability

The Hymer B 504 DL combines comfortable travelling with powerful technology and an extensive range of equipment. The 177 HP engine paired with automatic transmission provides relaxed and effortless driving, making longer journeys particularly comfortable.

Comfort & Practicality

The double floor provides a pleasantly warm floor and helps protect the water tanks from freezing temperatures. With a **150-litre fresh water tank** and **100-litre waste water tank**, the Hymer is well suited to extended trips.

The **Truma Combi 6E heating system** provides comfortable temperatures throughout the year and can be operated using both gas and electricity.

The permanently installed, certified **LPG gas bottles** allow convenient refuelling at LPG stations, eliminating the need to regularly handle and carry conventional gas bottles.

Powerful Energy System

The high-quality **Mastervolt electrical system**, a brand also used in the yacht sector, provides a strong foundation for independent travelling. The system includes:

- 3,000 W inverter
- 180 Ah Lion leisure battery
- 360 W photovoltaic solar panel

This setup provides excellent conditions for comfortable off-grid stays while maintaining a high level of convenience.

Safety & 360° Visibility

A major highlight is the comprehensive **360° camera system with 9 cameras and 3 monitors**. Together with four underbody spotlights, it provides excellent all-round visibility and makes manoeuvring easier, including at night.

Additional security features include **marten protection, an alarm system, gas and intrusion alarm, and additional locks on both the driver's and passenger's doors**. The central locking system also includes the rear garage.

Further Equipment

- 18" alloy wheels
- 8 tyres
- ABS, ESP and traction control
